

Suicide Prevention: A Public Health Approach

David A. Litts, O.D., F.A.A.O.
Suicide Prevention Resource Center

December 13, 2005

**“Problems are complex
and go beyond the
capacity, resources, or
jurisdiction for any single
person, program,
organization, or sector to
change or control.”**

Lasker R., Weiss E., Broadening Participation in Community Problem Solving: A Multidisciplinary Model to Support Collaborative Practice and Research. Journal of Urban Health: Bulletin of the New York Academy of Medicine. Vol 80, No 1. March 2003. p.5.

Suicide and Mental Illness

- 90% have diagnosable mental or substance abuse disorders or both
- 60% have unipolar depression
 - + Aggressiveness, anxiety, agitation
- Other associated mental health problems:
 - Schizophrenia
 - Bipolar disorder
 - Personality disorders, e.g., borderline
 - Anxiety disorders

Ecological Model

Individual Factors

Risk

- Age/Sex
- Mental illness
- Substance abuse
- Loss
- Previous suicide attempt
- Personality traits or disorders
- Incarceration
- Access to means (e.g., firearms)
- Failure/academic problems
- Unemployment
- Disability or illness

Protective

- Cultural and religious beliefs that discourage suicide and support self-preservation
- Support through ongoing health and mental health care relationships
- Coping/problem solving skills
- Resiliency, self esteem, direction, mission, determination, perseverance, optimism, empathy
- Intellectual competence (youth)
- Reasons for living

Peer/Family Factors

Risk

- History of interpersonal violence/conflict/abuse/bullying
- Exposure to suicide
- No-longer married
- Barriers to health care/mental health care
- Access to means (e.g., firearms)

Protective

- Family cohesion (youth)
- Sense of social support
- Interconnectedness
- Married/parent
- Access to comprehensive health care

Community Factors

Risk

- Isolation/social w/drawal
- Barriers to health care and mental health care
- Stigma
- Exposure to suicide
- Unemployment

Protective

- Access to healthcare and mental health care
- Social support, close relationships, caring adults, participation and bond with school
- Respect for help-seeking behavior
- Skills to recognize and respond to signs of risk

Societal Factors

Risk

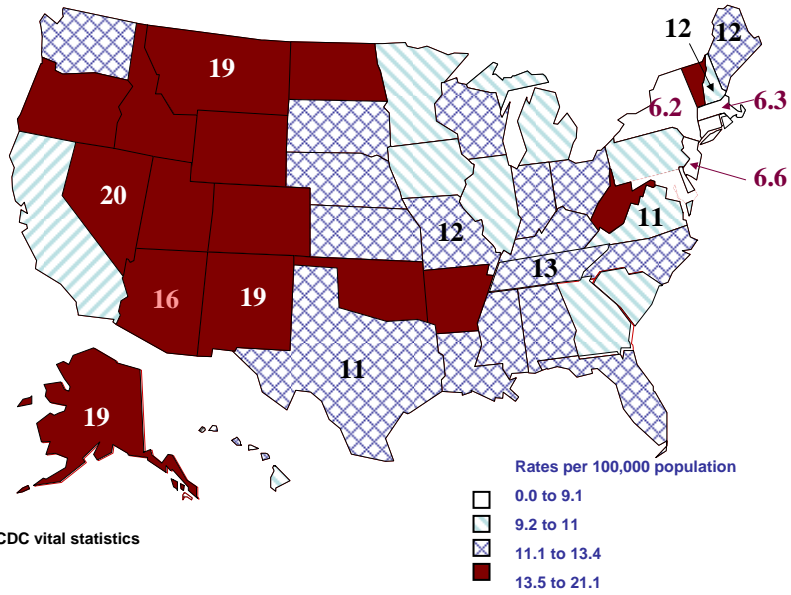

- Western
- Rural/Remote
- Cultural values and attitudes
- Media influence
- Alcohol misuse and abuse
- Social disintegration
- Economic instability

Protective

- Urban/Suburban
- Access to health care & mental health care
- Cultural values affirming life
- Media influence

Necessary Conditions for Prevention

- Knowledge base
- Political will
- Social strategy

Essential Ingredients for Success

- **Leadership**
- **Coalition**
- **Vision**
- **Organization**
- **Planning/Process**
- **A Plan**
- **Resources**
- **Implementation/Evaluation**

Coalition: Not Just Good Hearted People

Public Health	Mental Health
Education	Faith-based/community groups
Alcohol and Other Drug Abuse	Domestic violence/ Child protective services
Child Welfare	Juvenile Justice
Adult Corrections	Law Enforcement/First Responders
Crisis Intervention	Aging
Medical Examiner/Coroner	<u>Survivors/citizen advocates</u>

Coalition

Effective coalitions with highly satisfied members can produce plans of poor quality if they are not trained and equipped to do otherwise.

Butterfoss F, Goodman R, Wandersman A. Community Coalitions for Prevention and Health Promotions: Factors Predicting Satisfaction, Participation, and Planning. *Health Education Quarterly*, Vol 23(1): 65-79, Feb 1996.

Data-Driven Prevention Planning Model

Adapted from Richard Catalano and David Hawkins, U of Washington.

SPRC Goals

- Increase capacity
- Enhance partnerships
- Train clinicians and community members
- Disseminate evidence-based practices and other science-based information

SPRC Services

- Expert Consultation and Technical Assistance
- Training support
 - On-line training—youth suicide prevention
 - Workshop 1: Data
 - Workshop 2: Planning and Evaluation
 - Workshop 3: An Introduction to Gatekeeping
 - Face-to-face curricula
 - Community core competencies +
 - Clinical core competencies
 - First Responder Course

Prevention goes beyond changing individuals--it changes cultural norms
--Murray Levine (1998)

The National Strategy for Suicide Prevention is designed to be a catalyst for social change with the power to transform attitudes, policies and services.

-- The National Strategy (2001)
